

IR Collaborate experience and performance management

Simplify complexity to ensure the lines of communication are always open

IR Collaborate is an enterprise-grade performance and experience management solution for voice, video, collaboration and contact center environments. Whether in the cloud, on-premises or hybrid, Collaborate makes it easy to manage the multi-vendor, multi-platform UC ecosystems that modern businesses rely on every day.

gain in customer satisfaction

employee productivity gain

faster incident resolution

Plan, deploy & migrate

Maximize success and deliver a seamless user experience throughout technology transitions with insight into important metrics like capacity, bandwidth, and network performance, as well as comprehensive outside and inside testing.

Monitor, alert & identify

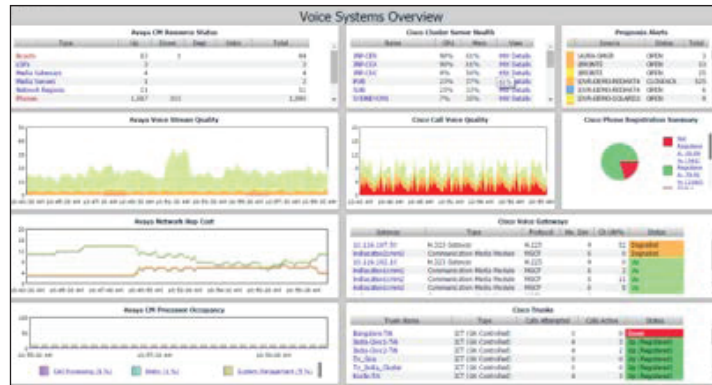

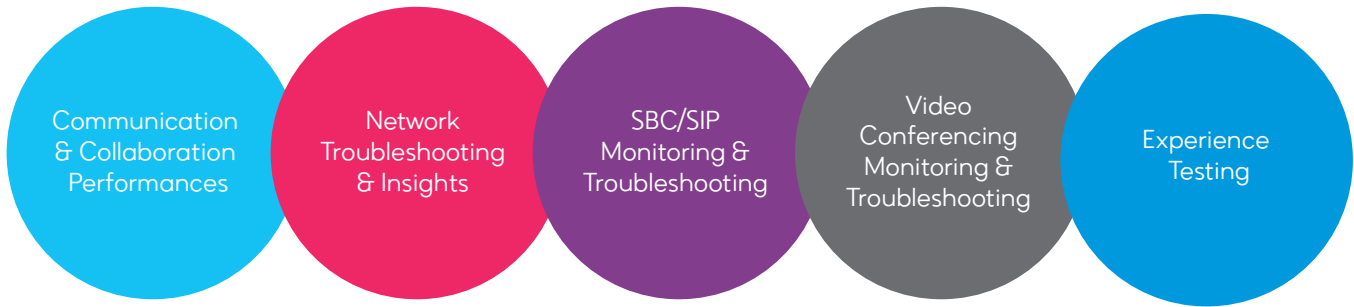

Real-time, proactive monitoring and alerting puts you in control, allowing you to be aware sooner, respond faster and resolve unified communications performance issues before they become customer facing.

Troubleshoot & diagnose

Quickly identify the root-cause of problems you can resolve issues faster and minimize user impact. Leverage granular data analytics and historical data to diagnose problems at all levels, from network to endpoints.

Analyze & report

With a full suite of analytics, comprehensive reporting capabilities, and customizable dashboards you can see data across network layers, routers, SBCs, vendors and applications, to help you get an accurate picture of user experience, and make better strategic decisions.

With Collaborate you can:

- ✓ Improve user experience
- ✓ Streamline operations
- ✓ Proactively prevent problems
- ✓ Get broad multi-vendor visibility
- ✓ Uncover intelligent insight to make better strategic decisions
- ✓ Boost adoption and maximize ROI on your investment
